

Program

- Marco Stolwijk, Head of Property Management at Kadans Science Partner, will inform you about the measures Kadans has realized in their public spaces.
- Menno Polman, Housing and Workplace Consultant at YNNO, will advise you on how to implement the 1.5 meter measures in your own office space and fully adapted working station.
- Theo de Haas, Laboratory Expert at Kadans Science Partner, will share some experiences from other labs on how to deal with 1.5 meter measures in your own lab space.
- **Q&A session**; Marco, Menno and Theo will answer your questions about implementing 1.5 meter measures.

Our goal: Maintain social distancing and at the same time deliver an 24/7 multitenant working environment

Customer- and guest journey

- 1. Way finding and signing.
- 2. One direction

Our goal: Maintain social distancing and at the same time deliver an 24/7 multitenant working environment

Safety host

- 1. Welcoming (on location);
- 2. Reassurance (about site safety);
- 3. Inform (about the measures taken);
- 4. Referring (to the correct one-direction routes / entrances and exits / seats);
- 5. Handing out (of kits and / or protective equipment and / or access passes);
- 6. Supervising / regulating (addressing behavior and keeping distance).

Our goal: Maintain social distancing and at the same time deliver an 24/7 multitenant working environment

Food and Beverages

- 1. Custom menu
- 2. Take away/lunchbag
- 3. Banqueting
- 4. Coffee

Our goal: Maintain social distancing and at the same time deliver an 24/7 multitenant working environment

Facilities/reception/hospitality

- 1.Extra cleaning
- 2. Reception on a social distance

General instructions

- Do you suffer from flu, fever and / or other flu-like complaints: Stay at home!
- Wash your hands regularly
- Use disinfectant hand gel when entering the building
- Keep at least 1.5 meters away from other persons
- Avoid grouping

By taking these precautions and instructions together, we can minimize infection risks!

INSTRUCTIES

INSTRUCTIONS

Wees welkom in ons gebouw en handel verantwoord Feel welcome in our building and act responsibly

Heeft u last van keelpijn, hoesten, koorts en/of andere griepachtige klachten: blijf thuis If you have a sore throat, cough, fever and/or other flu-like symptoms: stay home

1.5-meter lab and office measures

Menno Polman May 2020

Introduction

YNNO
We help you discover,
define, design, implement
and use your new
work environment.

YNNO's Vision

The world is constantly changing. As a consequence of Covid-19, values and norms in society are changing even more rapidly. The well-being of our employees, the digitisation of our society and the concern for our planet are changing the nature of our work.

This also affects the way we interact, communicate, work and live.

Covid-19 measures

- To make the office Covid-19 proof, many organisations are thinking about the 1.5-meter office concept with a focus on the physical working environment.
 - Social distancing;
 - Hygienic measures;
 - Adjustments to the working environment, technical installations, elevators, restaurant and toilets;
- These preconditions must be met before the office can open again. In the 1.5-meter society, it's not just about setting up a 1.5-meter office, but about developing a 1.5-meter way of working.

TEUN VAN DE KEUK

De kantoortuin komt niet meer terug

april 2020

aatst was ik – op gepaste afstand uiteraard – op bezoek bij een bedrijf dat zijn medewerkers zo snel mogelijk weer op kantoor wil hebben.

Impact Covid-19

- Accelerator of new ways of working;
- Location- and time-independent working is the standard;
- Digital working forms the basis;
- Independent professionals: competent, entrepreneurial, responsible and resultoriented;
- Flexible and multifunctional office environment focused on meeting and working together (flexible ≠ open office);
- Working from home becomes part of the routine.

1.5-meter organisation scan

- The 1.5-meter organisation scan provides companies with a first, integral picture of how your organisation is prepared for the new reality. The scan focusses on:
 - Bricks: A safe office, in accordance with the guidelines
 - Behaviour: Motivation and connection of and between colleagues
 - Bits: Efficient and effective place and time free working
 - Vitality and sustainable employability: Committed employees who deal well with (experienced) work pressure and work stress.

Kadans Science Partner

LABORATORIES

≤1.5 METER

As we were used to:

- Intensively used spaces
- Different equipment around room
- Many people circulating
- Sometimes even close to another

And we have:

- Spacious rooms
- Wide (island) benches
- Wide corridors (safety)

| LABORATORIES

≥1.5 METER

What we must get used to Because what doesn't change:

- Laboratory spaces
- Activities and equipment

What must change:

- 1. Less people in the lab
- 2. More streamlined ways of working

Some solutions

- 1. Less people
- 2. Clear routing
 - One way circulation
 - First in last out
 - Passing lanes

Special attention

CREATIVITY

- For activities requiring 2 people at ≤1.5 m, e.g. applying screens
 SAFETY
- Be prepared for incidents and have PPE in place for helpers
 LEADERSHIP
- Be on site, listen, act and decide to help resolve uncertainty

Coming soon Return to the lab with Bookit

Manage your lab in a safe, controlled and simple way in these new times with a digital lab booking system.

- Manage your lab users remotely
- Control the amount of people in the lab
- Assign different schedules to groups of people
- Create a safe work environment
